EDUCATION

Hacktiv8, Jakarta, Indonesia, 2024 - 2024

Certification in **Full Time Backend Golang** | GPA: 88.55 / 100

- Built a Learning Management System (LMS) using microservices architecture with Go (Golang)
- Implemented RESTful APIs, authentication, and service-to-service communication
- Used PostgreSQL, MongoDB and Docker to support scalable and containerized development

Gunadarma University, Depok, Indonesia, 2017 - 2021

Bachelor in **Information System** | GPA: 3.33 / 4.00

- Participated in the Merdeka Internship Program (Batch 1) at PT Citiasia as a Backend Developer using Laravel

WORK EXPERIENCE

Full Stack Developer - Permanent Employee

PT INFINI SOFTWARE HOUSE TECHNOLOGY DMCC | Dubai, United Arab Emirates, July 2022 - Present

- Developed and maintained enterprise-level web applications using Java (Spring Boot) for backend and NextJS frameworks for frontend.
- Designed and integrated RESTful APIs to support seamless communication between services and external systems.
- Collaborated in an agile team to deliver scalable, secure, and high-performance software solutions.

INTERNSHIP EXPERIENCE

Backend Developer

PT CITIASIA | Jakarta, Indonesia, August 2021 - June 2022

- Developed and maintained backend features for internal and client-facing web applications using Laravel framework.
- Built RESTful APIs and handled database design, query optimization, and business logic implementation.
- Collaborated with frontend developers and project managers to deliver reliable and scalable solutions on time.

PROJECTS

Logistics Web System - PT TOP KARGO INDONESIA

Jakarta, Indonesia, February 2022 - August 2022

- Worked as a Web Developer at PT Top Kargo Indonesia (Jakarta), developing and maintaining a logistics web platform using Laravel.
- Implemented key features including shipment tracking, order management, payment integration, and third-party APIs.
- Collaborated with cross-functional teams to deliver a secure, scalable, and user-friendly system that improved customer shipment tracking and service ordering.

Company Profile - PT INNOX INDONESIAN,

Jakarta, Indonesia, June 2021 - July 2021

- Involved in developing the company profile for PT Innox Indonesia (Jakarta). The project included collecting company information such as company history, vision and mission, as well as products and services offered.

- I collaborated with internal teams to gather data, conducted interviews with company leadership, and organized the information into clear and engaging content that accurately represented the company's identity.
- The final deliverable was a professional company profile document used for marketing purposes and presentations to potential clients.

Nuvora (Multi-Tenant SaaS Platform)

Bekasi, Indonesia, 2025

- Developed a multi-tenant SaaS platform designed to support multiple businesses under a single system architecture.
- Built backend services using Go (Echo Framework) and designed scalable database structures using PostgreSQL.
- Implemented authentication, tenant management, and role-based access control.
- Designed a reusable landing page system that allows different stores to create their own pages and redirect products to marketplaces such as Shopee and Lazada.

Dexova (SaaS Business Management System)

Bekasi, Indonesia, February 2026

- Developed a SaaS platform for business management including HRIS, POS, and Inventory Management modules.
- Implemented backend services using Go, focusing on modular architecture and scalable APIs.
- Built modern frontend interfaces using Next.js to provide responsive dashboards and administrative tools.
- Designed system features such as employee management, stock tracking, and transaction monitoring.

Helixio (Business Website Platform)

Bekasi, Indonesia, January 2026 - Present

- Developed and maintained a project management web application similar to Trello, designed to help teams organize tasks and workflows.
- Implemented core features such as task boards, task cards, status columns, and drag-and-drop task management.
- Built backend APIs to manage projects, tasks, and user data while ensuring efficient data processing and scalability.
- Developed responsive frontend interfaces to enable smooth task interaction and real-time updates.
- Improved application performance and maintainability through structured code architecture and system optimization.

Rahan Mancar (SaaS Landing Page System)

Bekasi, Indonesia, Desember 2026

- Developed a SaaS-based landing page builder that enables businesses to quickly create and publish marketing pages without complex development.
- Implemented a template-based page generation system allowing users to customize layouts, content sections, and visual components.
- Built modular and reusable UI components to accelerate landing page creation and maintain design consistency.
- Developed backend services to manage page data, templates, and user configurations.
- Optimized page performance and ensured responsive design across desktop and mobile devices.

CERTIFICATION

- Learn Golang from beginner to Advance, Udemy, Number: UC-d1e9dcbf-1735-4c2a-1500bdfb9206, 2024
- Internship Certification, Citiasia Inc, Number: 001/MBKM/B1/CAI/II/2022, 2022

SKILL

- **Soft Skill** : Problem solving, Teamwork, Adaptability, Communication, Time management
- **Hard Skill** : Golang, JavaScript, Python, Java, Laravel, Spring Boot, Echo, Gin, React.js, Node.js, REST API, Microservices, MySQL, PostgreSQL, MongoDB, Redis, SQL Server, Git
- **Software Skill** : VS Code, IntelliJ IDEA, Postman, GitHub, GitLab, Docker, Linux
